Brain abscess
cerebellar abscesses secondary to occipital dermoid cyst with dermal sinus, 266
diffusion-weighted MR imaging in preoperative assessment of, 395
gas-containing otogenic, 271
Brain tumors
brain metastases from asymptomatic adenocarcinoma of pancreas, 332
comparison of endonasal endoscopic surgery and sublabial microsurgery for prolactinomas, 371
dural arteriovenous fistula after craniotomy for pilocytic astrocytoma in patient with protein S deficiency, 59
intracranial metastasis or meningioma?, 241
oligodendroglioma: pathology and molecular biology, 111
primary B-cell lymphoma of clivus, 246
prognostic factors in patients who survived more than 10 years after undergoing surgery for metastatic brain tumors, 118
symptom changes caused by movement of a calcified lateral ventricular meningioma, 128

C

Carotid artery
endovascular treatment of carotid artery stenosis presenting with progressing stroke, 148
subarachnoid hemorrhage as result of fungal aneurysm at posterior communicating artery associated with occlusion of internal carotid artery, 261
unruptured carotid-duplicated middle cerebral artery aneurysms, 322
Cavernoma, preoperative assessment of motor cortex and pyramidal tracts in central cavernoma employing functional and diffusion-weighted MRI, 302
Cerebral vasospasm
attenuation of hemolysate-induced cerebrovascular endothelial cell injury and of production of endothelin-1 and big endothelin-1 by an endothelin-converting enzyme inhibitor, 181
indications for endovascular therapy for refractory vasospasm after aneurysmal subarachnoid hemorrhage, 131
Cerebrospinal fluid leak, demonstrated by three-dimensional CT myelography in patients with spontaneous intracranial hypotension, 280
Cervical spondylosis, posterior approaches in management of ossification of posterior longitudinal ligament and, 194
Cisternography, cerebrospinal fluid leak demonstrated by three-dimensional CT myelography in patients with spontaneous intracranial hypotension, 280
Clivus, primary B-cell lymphoma of, 246
Coagulability, perioperative assessment using thromboelastography, 5
Computed tomography
intracranial metastasis or meningioma?, 241
split cord malformation with paresis of unilateral lower limb, 406
Craniotomy
dural arteriovenous fistula after craniotomy for pilocytic astrocytoma in patient with protein S deficiency, 59
perioperative deep vein thrombosis in Chinese patients undergoing, 274

D

Deep vein thrombosis, perioperative
assessment of coagulability using thromboelastography, 5
in Chinese patients undergoing craniotomy, 274
Dermoid cyst, occipital, with dermal sinus, cerebellar abscesses secondary to, 266
Developing countries, telemedicine and neurosciences in, 388
Diameter-cube hypothesis: new biophysical model of aneurysm rupture, 166
Diskectomy, lumbar, with preservation of ligamentum flavum, 68-le
Dural arteriovenous fistula
after craniotomy for pilocytic astrocytoma in patient with protein S deficiency, 59
ethmoidal, alternative management considerations for, 410
intracranial, showing diffuse MR enhancement of spinal cord, 251

Editorials
Intraoperative angiography for aneurysm surgery: what it really means, 351
Lessons from Enron for neurosurgeons, 158
The neurosurgical-biomedical complex gone wrong, 65
Practice patterns in the U.S., 349, 430
"Subspecialization" according to Couldwell and Rovit, 427-ed
In this issue, 1, 71, 161, 291, 355
Thoughts on neurosurgery in Taiwan, 66
Why the International Study of Unruptured Intracranial Aneurysms has lost credibility with neuroscientists, 287
Electrical stimulation of human cerebral cortex, Horsley's intraoperative use of, 425
Electroencephalography (EEG), sensitivity of scalp EEG, cortical EEG, and somatosensory evoked responses during surgery for intracranial aneurysms, 317
Empty sella syndrome, role of visual system herniation, 42
Endoscopy, comparison of endonasal endoscopic surgery and sublabial microsurgery for prolactinomas, 371
Endothelin-1, attenuation of hemolysate-induced cerebrovascular endothelial cell injury and of production of endothelin-1 and big endothelin-1 by an endothelin-converting enzyme inhibitor, 181
Epilepsy surgery, Horsley's use of electrical stimulation of human cerebral cortex intraoperatively, 425

Evoked potentials, sensitivity of scalp EEG, cortical EEG, and somatosensory evoked responses during surgery for intracranial aneurysms, 317

F
Foramen magnum meningioma, long-lasting improvement of arterial hypertension after surgical treatment of, 189
Fracture, seizure-induced thoracic spine compression fracture, 214

G
Gamma knife
  fetal and ovarian radiation dose in patients undergoing gamma knife radiosurgery, 32
  stereotactic radiosurgery for aggressive papillary tumor of temporal bone, 124
Gas-containing otogenic brain abscess, 271
Gunshot injuries, civilian infratentorial, 225

H
Headache
  cerebrospinal fluid leak demonstrated by three-dimensional CT myelography in patients with spontaneous intracranial hypotension, 280
  primary empty sella syndrome: role of visual system herniation, 42
Hematoma, subdural
  acute, in infancy, 218
  cerebrospinal fluid leak demonstrated by three-dimensional CT myelography in patients with spontaneous intracranial hypotension, 280
  chronic, role of postoperative patient posture in recurrence of, 385
  transdural metastasis from adenocarcinoma of prostate mimicking, 329
Hemorrhage
  midbrain hemorrhage presenting with oculomotor nerve palsy, 417
  perioperative assessment of coagulability using thromboelastography, 5
  subarachnoid
    attenuation of hemolysate-induced cerebrovascular endothelial cell injury and of production of endothelin-1 and big endothelin-1 by an endothelin-converting enzyme inhibitor, 181
    endovascular treatment of kissing aneurysms at fenestrated basilar artery, 54
    indications for endovascular therapy for refractory vasospasm after aneurysmal subarachnoid hemorrhage, 131
    as result of fungal aneurysm at posterior communicating artery associated with occlusion of internal carotid artery, 261
    three dimensional digital subtraction angiography of ruptured aneurysm on anterior communicating artery, 49
Heterotopic ossification in orbit, 421
Horsley's use of electrical stimulation of human cerebral cortex intraoperatively, 425
Hydrocephalus
  civilian infratentorial gunshot injuries, 225
  treatment in adults, 377
Hypertension, arterial, long-lasting improvement after surgical treatment of foramen magnum meningioma, 189

I
Infection
  cerebellar abscesses secondary to occipital dermoid cyst with dermal sinus, 266
  diffusion-weighted MR imaging in preoperative assessment of brain abscesses, 395
  gas-containing otogenic brain abscess, 271
Infratemporal fossa approach via lateral transantral maxillotomy, 21
Intervertebral disc
  lumbar disc herniation: level increases with age, 209
  lumbar diskectomy with preservation of ligamentum flavum, 68-le
Intracranial pressure
  cerebrospinal fluid leak demonstrated by three-dimensional CT myelography in patients with spontaneous intracranial hypotension, 280
  interhemispheric intracranial pressure gradients in nonhuman primate stroke, 295
Intraoperative monitoring
  angiography, 316
  Horsley's use of electrical stimulation of human cerebral cortex intraoperatively, 425
  intraoperative angiography for aneurysm surgery: what it really means, 351-ed
  selective intraoperative angiography in intracranial aneurysm surgery, 309
  sensitivity of scalp EEG, cortical EEG, and somatosensory evoked responses during surgery for intracranial aneurysms, 317
Ischemia
  interhemispheric intracranial pressure gradients in nonhuman primate stroke, 295
  sensitivity of scalp EEG, cortical EEG, and somatosensory evoked responses during surgery for intracranial aneurysms, 317

L
Ligamentum flavum, lumbar diskectomy with preservation of, 68-le
Lipomas, multiple subpial, with dumb-bell extradural extension through the intervertebral foramen without spinal dysraphism, 338
Lumbar spine
  lumbar disc herniation: level increases with age, 209
  lumbar diskectomy with preservation of ligamentum flavum, 68-le
Lymphoma of clivus, primary B-cell, 246

M
Magnetic resonance angiography
  growth of small unruptured intracranial aneurysm, 155
  unruptured carotid-duplicated middle cerebral artery aneurysms, 322

Magnetic resonance imaging (MRI)
complete regression of intracranial arteriovenous malformations, 139
diffusion-weighted MR imaging in preoperative assessment of brain abscesses, 395
familial ossification of posterior longitudinal ligament in thoracic spine, 403
intracranial dural arteriovenous fistula showing diffuse MR enhancement of spinal cord, 251
midbrain hemorrhage presenting with oculomotor nerve palsy, 417
preoperative assessment of motor cortex and pyramidal tracts in central cavernoma employing functional and diffusion-weighted MRI, 302
primary empty sella syndrome: role of visual system herniation, 42
split cord malformation with paresis of unilateral lower limb, 406
Maxillary sinus, modified infratemporal fossa approach via lateral transantral maxillotomy, 21
Medical education
rethinking neurosurgical subspecialization, 359
"subspecialization" according to Couldwell and Rovit, 427-ed
Meningioma
vs. intracranial metastasis, 241
long-lasting improvement of arterial hypertension after surgical treatment of foramen magnum meningioma, 189
symptom changes caused by movement of a calcified lateral ventricular meningioma, 128
Metastasis
brain metastases from asymptomatic adenocarcinoma of pancreas, 332
intracranial metastasis or meningioma?, 241
prognostic factors in patients who survived more than 10 years after undergoing surgery for metastatic brain tumors, 118
transdural metastasis from adenocarcinoma of prostate mimicking subdural hematoma, 329
Microsurgery
comparison of endonasal endoscopic surgery and sublabial microsurgery for prolactinomas, 371
modified infratemporal fossa approach via lateral transantral maxillotomy, 21
tilting operating table with self-control foot switch, 344
Middle cerebral artery aneurysms, unruptured carotid-duplicated, 322
Middle meningeal artery traumatic pseudoaneurysm and subsequent fistula formation with cavernous sinus, 325
Minimally invasive surgery
comparison of endonasal endoscopic surgery and sublabial microsurgery for prolactinomas, 371
modified infratemporal fossa approach via lateral transantral maxillotomy, 21
Molecular biology of oligodendroglioma, 111

N

Neoplasms
brain metastases from asymptomatic adenocarcinoma of pancreas, 332
comparison of endonasal endoscopic surgery and sublabial microsurgery for prolactinomas, 371
dural arteriovenous fistula after craniotomy for pilocytic astrocytoma in patient with protein S deficiency, 59
intracranial metastasis or meningioma?, 241
long-lasting improvement of arterial hypertension after surgical treatment of foramen magnum meningioma, 189
multiple subpial lipomas with dumb-bell extradural extension through the intervertebral foramen without spinal dysraphism, 338
oligodendroglioma: pathology and molecular biology, 111
preoperative assessment of motor cortex and pyramidal tracts in central cavernoma employing functional and diffusion-weighted MRI, 302
primary B-cell lymphoma of clivus, 246
primary empty sella syndrome: role of visual system herniation, 42
primary osteogenic sarcoma of skull, 234
stereotactic radiosurgery for aggressive papillary tumor of temporal bone, 124
symptom changes caused by movement of a calcified lateral ventricular meningioma, 128
transdural metastasis from adenocarcinoma of prostate mimicking subdural hematoma, 329
Neurosurgery
lessons from Enron for neurosurgeons, 158-ed
the neurosurgical-biomedical complex gone wrong, 65-ed
practice patterns in the U.S., 286, 349-ed, 430-ed
rethinking neurosurgical subspecialization, 359
"subspecialization" according to Couldwell and Rovit, 427-ed
telemedicine and neurosciences in developing countries, 388
thoughts on neurosurgery in Taiwan, 66-ed
why the International Study of Unruptured Intracranial Aneurysms has lost credibility with neuroscientists, 287-ed
Neurosurgical Society of America, 55th Annual Meeting Abstracts, 77
